

SHARON WOODS BLVD BIKE LANES

HAMPSTEAD DR TO HILLANDALE AVE

PROJECT OVERVIEW

The City of Columbus will install a dedicated two-way bike lane on the east side of Sharon Woods Blvd for safe bicycle travel to neighborhood and other destinations, including Beechcroft High School, Northgate Intermediate School, Beechcroft and Northgate parks and area churches. On-street parking will remain on the west side.

- Optimizing roadway space on Sharon Woods Blvd for the marked bike lane, from Hillandale Avenue to Hampstead Drive, will help to narrow the vehicle travel lanes and reduce unsafe driver speeds.
- The two-way bike lane will connect to existing bike lanes on Schrock Rd, and to the shared-use path being constructed in phases along SR 161.
- Sharon Woods Blvd is a priority route in the city's Bike Plus Plan.
- Dedicated bike space also aligns with the city's Vision Zero initiative and Complete Streets policy to consider the safety of all roadway users – people of all ages and abilities who walk, bike, drive or use transit to get around.

Two-Way Bike Lanes Implementation

The Department of Public Service will be constructing a buffered two-way bike lane on the east side of the street. Parking will be preserved on the west side of the street.

WHERE WILL I SET MY TRASH CONTAINER ON COLLECTION DAY?

SHARON WOODS BLVD BIKE LANE & TRASH COLLECTION CHANGES — FREQUENTLY ASKED QUESTIONS

- **When will the dedicated two-way bike lane be installed?**

Installation is anticipated to begin in mid-August (weather dependent) during a Department of Public Service preventive maintenance project on the Sharon Woods Blvd roadway asphalt to protect the existing surface and correct uneven pavement.

The contractor will post temporary no parking signs at least 72 hours before pavement work starts.

- **Will city trash collection be impacted by the new bike lanes?**

Only if you live on the east side of Sharon Woods Blvd. After the dedicated bike lane is installed, the trash pickup location for residents along the east side will move from the curb lane to the striped buffer area separating the bike lane from the vehicle lane. Residents on the east side should place your green container in the buffer area for collection.

- **Will this affect recycling and yard waste pickup, too?**

Yes, only for residents who live on the east side of Sharon Woods Blvd. Just like trash collection, residents on the east side should set out your blue recycling container and yard waste in the striped buffer area for pickup.

- **Is my collection point changing if I live on the west side of Sharon Woods Blvd?**

No, the collection point for residents who live on the west side will not change. Please continue to place your trash and recycling containers and yard waste at the curb on your scheduled collection days.

NOTE: There is no change in the Sharon Woods Blvd trash collection color for all households. Residents should continue to follow the NAVY rotating-holiday schedule.

- **If I schedule a bulk pickup through 311, where should I set item(s)?**

The collection point for scheduled bulk pickup will not change on either side of Sharon Woods Blvd. Items for pickup should be placed at the curb no more than 3 days before your scheduled collection and at least 4 feet from obstructions.

- **When does the change in the collection location begin?**

The new collection point will begin after the bike lane installation.
